Old Shiloh Bridge Replacement - project update

This letter provides an update regarding the upcoming construction activities associated with the replacement of the Old Shiloh Road Bridge.

Current project status
The Town has retained a design-build team to complete the detailed design and construction of the new bridge. Design work is currently underway, and environmental approvals and permit applications have been submitted for review. The detailed design is anticipated to be complete by end of 2026, with major construction expected shortly after.

Upcoming construction activities
During the week of Sept. 28, 2026, a turbidity curtain will be installed along the Pefferlaw River banks below the bridge. This curtain will be extended into the creek at a later date to ensure separation from construction activities and aquatic wildlife.

Planned work for early December 2026 includes a coffer dam installation parallel to each abutment under the bridge, silt fence installation, tree removals and early staging works.

Planned work for early 2027 includes the full decommissioning of the existing bridge, roadway reconstruction, grading, utility relocations and construction of the new bridge.

Anticipated full road closure
A full road closure is anticipated for 36 weeks with an expected start date of January or early February 2027. The full road closure is required as the existing bridge will be removed in its entirety and a new bridge will be constructed. The exact dates will be determined as the design and permitting requirements move forward. Notification including letters to residents, on-site signage and webpage updates will be provided a minimum of two weeks in advance of the full road closure.

Commemorative artwork and display board
In 2025, Council directed staff to commemorate the existing concrete arch bridge by procuring an original artwork and commemorative display board. This work is nearing completion and will be unveiled in the near future. Details about the artwork and commemorative display will be shared at a later date.
